Introduction: Biblical Hebrew *kī*

- (1) a. Complementizer
'And he came into Hagar and she became pregnant, and she saw **that** she had become pregnant.'
(Gen. 16:4)
- b. Causal
'And Isaac prayed to Yahweh on behalf of his wife, **because** she was barren.'
(Gen. 25:21)
- c. Adversative
'And they conquered the hills, **but** could not conquer the people living in the plains'
(Jdg. 1:19a)
- d. Resultative
'How have I sinned [**with the result**] **that** you have chased after me?'
(Gen. 31:36)

...and more: conditional, temporal, concessive, standalone, ...

Introduction: Biblical Hebrew *kī*

(Developmental paths of *kī* according to Locatell (2017: 280); DM = discourse marker; EX = exceptive; RS = restrictive 'only'; N_CON = negative condition 'unless'; APOD = apodosis.)

Christian S. Locatell. 2017. *Grammatical polysemy in the Hebrew Bible: A cognitive linguistic approach to כִּי*. University of Stellenbosch dissertation

Outline & Claims

1. Complementizers are often sensitive to **information status**
2. Biblical Hebrew *kī* is marked for use of **Common Ground**
3. The various syntactic/semantic functions are **pragmatically inferred**
4. The reference to Common Ground derives from a persistent **[+distal] feature**

Complementation and Common Ground

- (2) *Liz has left, since her coat is not on the rack.*
⇒ Liz has left [at-issue]
⇒ Liz's coat is not on the rack [not-at-issue]
⇒ the absence of Liz's coat indicates that she left [not-at-issue]
(Charnavel 2017: 45)
- (3) *An automatic timer would soon turn [the light] off, for we [Ladover Jews] do not tamper with electricity on Shabbos.* (Chaim Potok, 1990, *The gift of Asher Lev*)

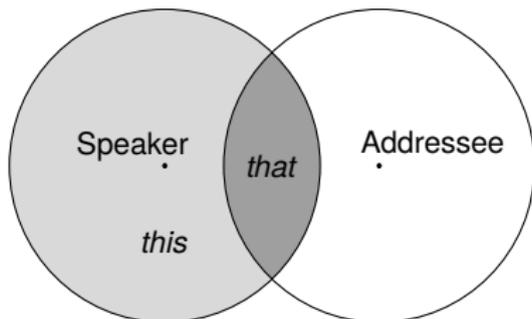

Isabelle Charnavel. 2017. Non-at-issueness of *since*-clauses. *Semantics and Linguistic Theory* 27. 43–58.
<https://doi.org/10.3765/salt.v27i0.4127>

Complementation and Common Ground

- (4) a. *Bio industry is still allowed.*
b. ***That** bio industry is still allowed!* (Staps & Rooryck 2023: 1204)
- (5) a. *I always believed (**that**) the jury was bribed.*
b. **(**That**) the jury was bribed, I always believed.* (Staps & Rooryck 2023: 1209)
- (6) a. *I thought you might need some help.*
b. *I thought **that** you might need some help.* (Bolinger 1972: 58)

Dwight Bolinger. 1972. *That's that*. (Janua Linguarum 155). The Hague: Mouton
Camil Staps & Johan Rooryck. 2023. The interpretation of [+distal] in demonstratives and complementizers. *Linguistics* 61. 1195–1231. <https://doi.org/10.1515/ling-2022-0178>

Complementation and Common Ground

(Staps & Rooryck 2023; cf. Colasanti & Wiltschko 2019)

Valentina Colasanti & Martina Wiltschko. 2019. Spatial and discourse deixis and the speech act structure of nominals. In *Proceedings of the 2019 annual conference of the Canadian Linguistics Association*, 1–14. <http://hdl.handle.net/2262/100137> (28 August, 2023)

Camil Staps & Johan Rooryck. 2023. The interpretation of [+distal] in demonstratives and complementizers. *Linguistics* 61. 1195–1231. <https://doi.org/10.1515/ling-2022-0178>

Complementation and Common Ground

Semitic *ka is [+distal], too!

	[-distal]	[+distal]
M.SG	<i>dənā</i>	<i>dənāk</i>
F.SG	<i>dā(t)</i>	<i>dāk</i>
M.PL	<i>ʔillēn</i>	<i>ʔillēk</i>
F.PL		<i>ʔillēki</i>

(Aramaic demonstrative paradigm [excerpt], Lipiński 2001: §36.37–44)

Complementation and Common Ground

Semitic *ka is [+distal], too!

	[-distal]	[+distal]
M.SG	<i>dənā</i>	<i>denāk</i>
F.SG	<i>dā(t)</i>	<i>dāk</i>
M.PL	<i>ʔillēn</i>	<i>ʔillēk</i>
F.PL		<i>ʔillēki</i>

(Aramaic demonstrative paradigm [excerpt], Lipiński 2001: §36.37–44)

- (7) English [+distal] demonstrative *that*
 → complementizer *that* marking Common Ground (Staps & Rooryck 2023)

Semitic [+distal] particle *ka
 → Hebrew complementizer *kī* marking Common Ground

Edward Lipiński. 2001. *Semitic languages: Outline of a comparative grammar*. 2nd edn. (Orientalia Lovaniensia Analecta 80). Leuven: Peeters
 Camil Staps & Johan Rooryck. 2023. The interpretation of [+distal] in demonstratives and complementizers. *Linguistics* 61. 1195–1231. <https://doi.org/10.1515/ling-2022-0178>

Accommodation and imposition

In many cases, $k\bar{i}$ indeed introduces **discourse-old** information content:

- (1a) 'And he came into Hagar and she became pregnant, and she saw **that** she had become pregnant.' (Gen. 16:4)

Accommodation and imposition

In many cases, *kī* indeed introduces **discourse-old** information content:

- (1a) 'And he came into Hagar and she became pregnant, and she saw **that** she had become pregnant.' (Gen. 16:4)

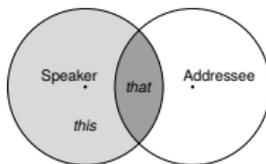

... but new information can be **accommodated** by the Addressee:

- (8) 'And **when** Isaac was old ..., he called Esau, his son.' (Gen. 27:1)

Accommodation and imposition

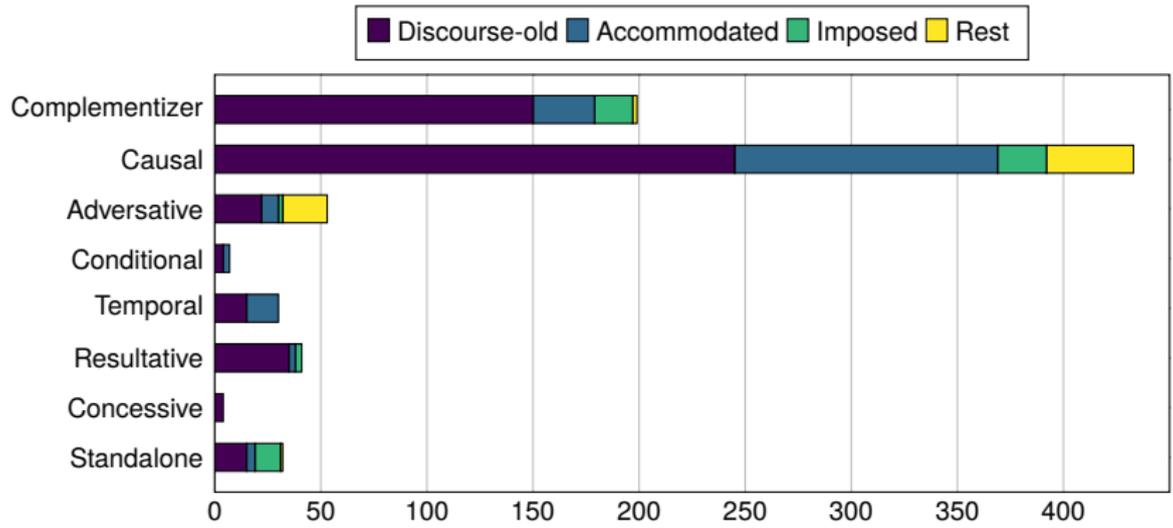

We see these three types all as reference to the [+distal] area between Speaker and Addressee (Staps & Rooryck 2023)

- ▶ Discourse-old: refers to element in [+distal] area
- ▶ Discourse-new:
 - ▶ Typically: request to move from [-distal] to [+distal]
 - ▶ Accommodated: presented as [+distal] to mark assumption
 - ▶ Imposed: presented as [+distal] to mark imposition

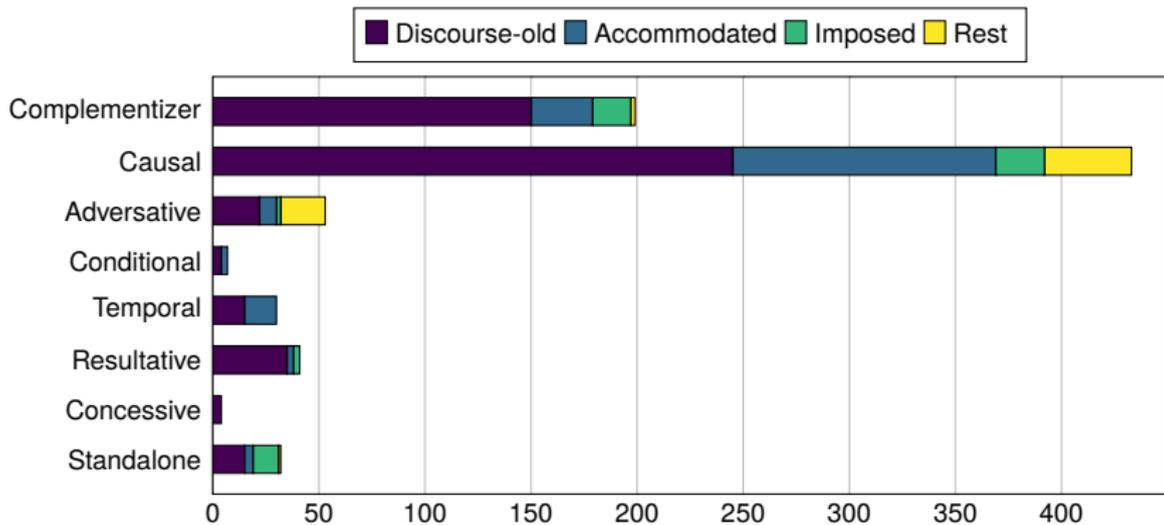

Camil Staps & Johan Rooryck. 2023. The interpretation of [+distal] in demonstratives and complementizers. *Linguistics* 61. 1195–1231. <https://doi.org/10.1515/ling-2022-0178>

Data

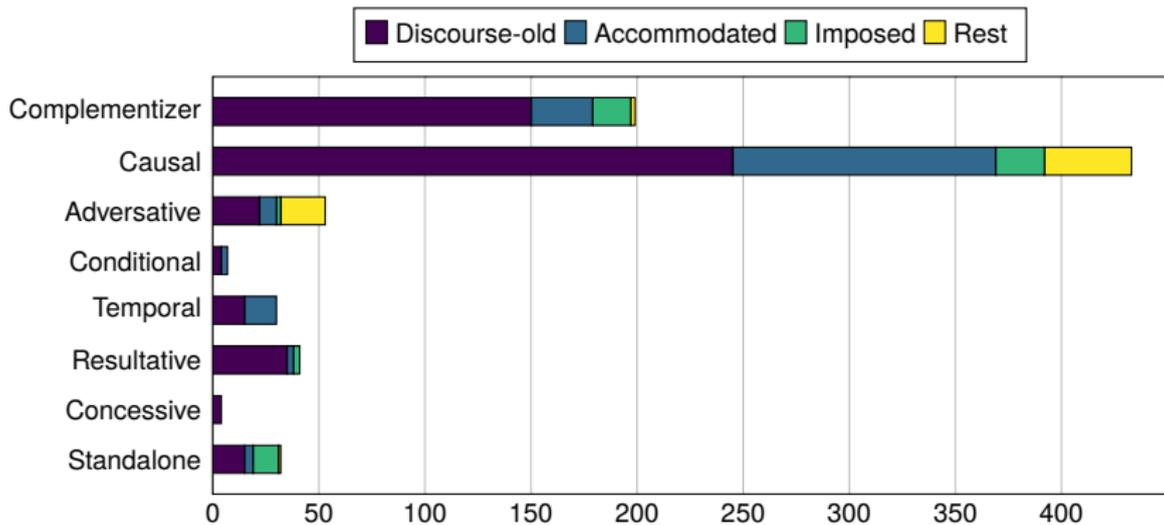

Data

Almost all exceptions fall in one of two interrelated categories

Data

Almost all exceptions fall in one of two interrelated categories

But this is not enough: maybe all complementizers (causal adverbs, ...) have such distributions?

Causal *kī*

Many cases of accommodation, similar to English *for/since*, e.g.:

(12) not 1PL-be_able\IPFV ... *kī* disgrace it for-us

'We cannot (do this, giving our sister to a man who is uncircumcised), **for** it is a disgrace to us.'
(Gen. 34:14)

Causal *kī*

Many cases of accommodation, similar to English *for/since*, e.g.:

- (12) not 1PL-be_able\IPFV ... *kī* disgrace it for-us
 'We cannot (do this, giving our sister to a man who is uncircumcised), **for** it is a disgrace to us.'
 (Gen. 34:14)

When the causal clause also includes new information, it is marked by particles like 'and behold':

- (13) stand_up\IMP-M.SG and=1PL-go_up\IPFV to-them *kī* see\PFV-1PL
 OBJ the=land(F) **and=see.IMP-M.SG** good-F.SG very
 '(And the Danites returned to their brothers ... and said:) "Come on, let's go up against them, **for** we saw their land, **and look**: it's very good!"'
 (Jdg. 18:9)

Causal *kī*

But there are relatively many exceptions, e.g.:

- (1b) and.PRET-3M-pray-SG Isaac to=Yahweh on_behalf_of wife-his *kī* barren-F.SG she
'And Isaac prayed to Yahweh on behalf of his wife, **because** she was barren
(, and God heard his prayer and Rebekah his wife conceived.)' (Gen. 25:21)

Causal *kī*

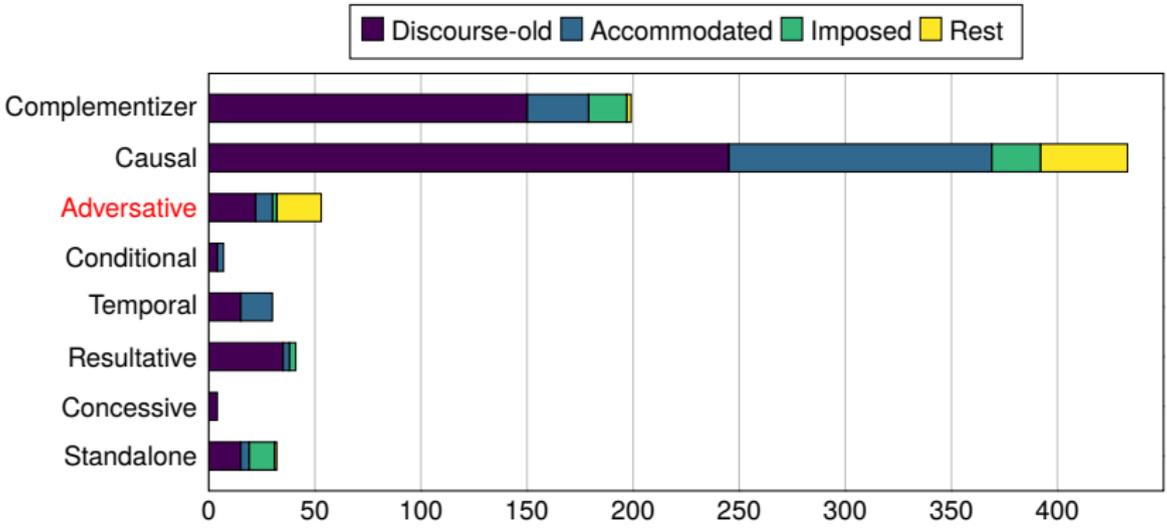

But there are relatively many exceptions, e.g.:

- (1b) `and.PRET-3M-pray-SG Isaac to=Yahweh on_behalf_of wife-his kī barren-F.SG she`
'And Isaac prayed to Yahweh on behalf of his wife, **because** she was barren
(, and God heard his prayer and Rebekah his wife conceived.)' (Gen. 25:21)

So we must assume that the causal function is lexicalized

- ▶ Based on high frequency
- ▶ Also note that the causal clause is still backgrounded and in that sense [+distal]

Adversative $k\bar{i}$

Adversative *kī*

Adversative easily develops from causal:

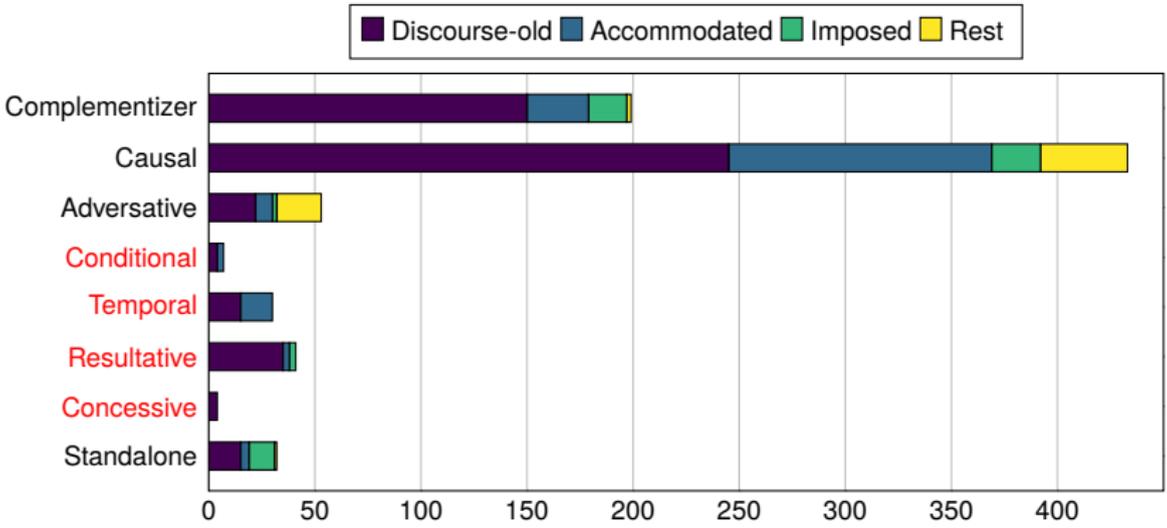

(14) not X, **because** Y > not X, **but** Y

This accounts for the high number of exceptions, e.g.:

(1c) and.PRET-3M-CONQUER-SG OBJ the=hill **kī** not to=conquer\INF OBJ inhabit\PTCP-M.PL.of
the=plain

‘And they conquered the hill country, **but** they could not conquer the people living
in the plains’
(Jdg. 1:19)

Conditional/temporal $k\bar{i}$

Conditional/temporal *kī*

More 'when' than 'if', so *kī* introduces a proposition that can be easily accommodated:

- (15) and.PRET-3M-command-SG OBJ the=first to=say\INF **kī** 3M-meet\IPFV-SG-you.OBJ Esau
 'He (Jacob) commanded the first [servant], saying, "**#If/When** Esau meets you"
 (Gen. 32:18)
- (16) man **kī** 3M-present\IPFV-SG from-you offering to=Yahweh from the=animals
 from the=herd or=from the=flock 2-present\IPFV-M.PL OBJ offering-yours **if**
 burnt_offering offering-his from the=herd male perfect 3M-present\IPFV-SG-it.OBJ
 '**If/When** a man amongst you brings a sacrifice to Yahweh, you must bring your
 offer from the animals of the herd or the flock. **If/*When** it is a burnt offering from
 the herd, he shall offer a male without blemish.'
 (Lev. 1:2–3)

Resultative *kī*

Kī refers to a result that has already been introduced:

- (17) who I ... *kī* 1SG-be\IPFV son_in_law to=the=king
'(Saul said to David: "Here is my oldest daughter Merab; I want to give her to you in marriage ..." But David said to Saul:) "Who am I ... *that* I should be the king's son-in-law?"'
(1 Sam. 18:18)

Resultative *kī*

Kī refers to a result that has already been introduced:

- (17) who I ... *kī* 1SG-be\IPFV son_in_law to=the=king
 '(Saul said to David: "Here is my oldest daughter Merab; I want to give her to you in marriage ..." But David said to Saul:) "Who am I ... **that** I should be the king's son-in-law?"'
 (1 Sam. 18:18)

... in contrast to other resultative markers, e.g.:

- (18) and.PRET-3M-say-SG to-them Reuben ... **in_order_to** rescue\INF OBJ-him
 from=hand-theirs
 'But Reuben said to them, ("Don't shed blood; throw him into this pit ... but do not stretch out your hand against them,") **in order to** rescue him out of their hand'
 (Gen. 37:22)

Concessive *kī*

Concessive clauses typically contain discourse-old information content:

- (19) *Though France did not win the World Championship, they did bring home a silver medal.*

Concessive *kī*

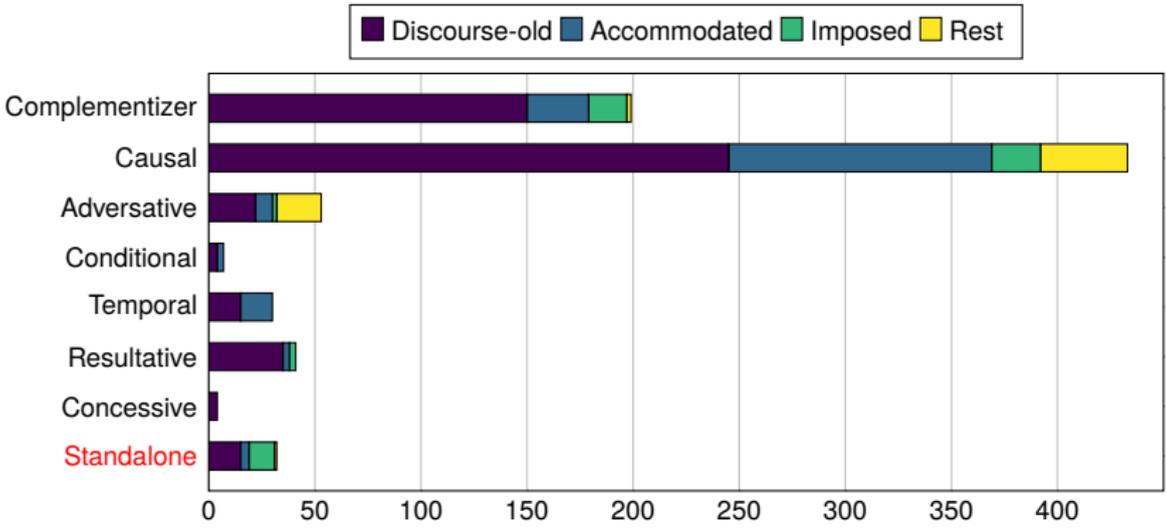

Concessive clauses typically contain discourse-old information content:

(19) *Though France did not win the World Championship, they did bring home a silver medal.*

It's the same with *kī*, but we cannot compare with other concessive adverbs:

(20) *kī* you do\PFV-2M.SG in=the=secret and=I 1SG-do\PFV OBJ the=thing the=this before all.of Israel
'**Though** you have acted in secret, I will do this before all of Israel.' (2 Sam. 12:12)

Standalone *kī*

Standalone *kī*, type 1: exclamatives

- (21) outcry(F)-of Sodom and=Gomorrah *kī* be_great\PFV-3F.SG and=sin(F)-theirs *kī*
be_heavy\PFV-3F.SG very
'That the outcry of/concerning Sodom and Gomorrah is so great! And that their
sin is so heavy!' (Gen. 18:20)

Standalone *kī*, type 1: exclamatives

- (21) outcry(F)-of Sodom and=Gomorrah *kī* be_great\PFV-3F.SG and=sin(F)-theirs *kī*
 be_heavy\PFV-3F.SG very
 ‘**That** the outcry of/concerning Sodom and Gomorrah is so great! And **that** their
 sin is so heavy!’ (Gen. 18:20)

In many other languages a [+distal] complementizer marks exclamatives, e.g.:

- (4b) *That bio industry is still allowed!* (Staps & Rooryck 2023: 1204)

Standalone *kī*, type 1: exclamatives

- (21) outcry(F)-of Sodom and=Gomorrah *kī* be_great\PFV-3F.SG and=sin(F)-theirs *kī*
be_heavy\PFV-3F.SG very
'That the outcry of/concerning Sodom and Gomorrah is so great! And that their
sin is so heavy!' (Gen. 18:20)

In many other languages a [+distal] complementizer marks exclamatives, e.g.:

- (4b) *That bio industry is still allowed!* (Staps & Rooryck 2023: 1204)

Exclamatives presuppose their propositional content (Zanuttini & Portner 2003), so the Speaker refers to the CG

Camil Staps & Johan Rooryck. 2023. The interpretation of [+distal] in demonstratives and complementizers. *Linguistics* 61. 1195–1231. <https://doi.org/10.1515/ling-2022-0178>

Raffaella Zanuttini & Paul Portner. 2003. Exclamative clauses: At the syntax-semantics interface. *Language* 79(1). 39–81. <https://doi.org/10.1353/lan.2003.0105>

Standalone *kī*, type 2: oaths

Oaths impose their content on the CG; the Speaker makes a strong assertion:

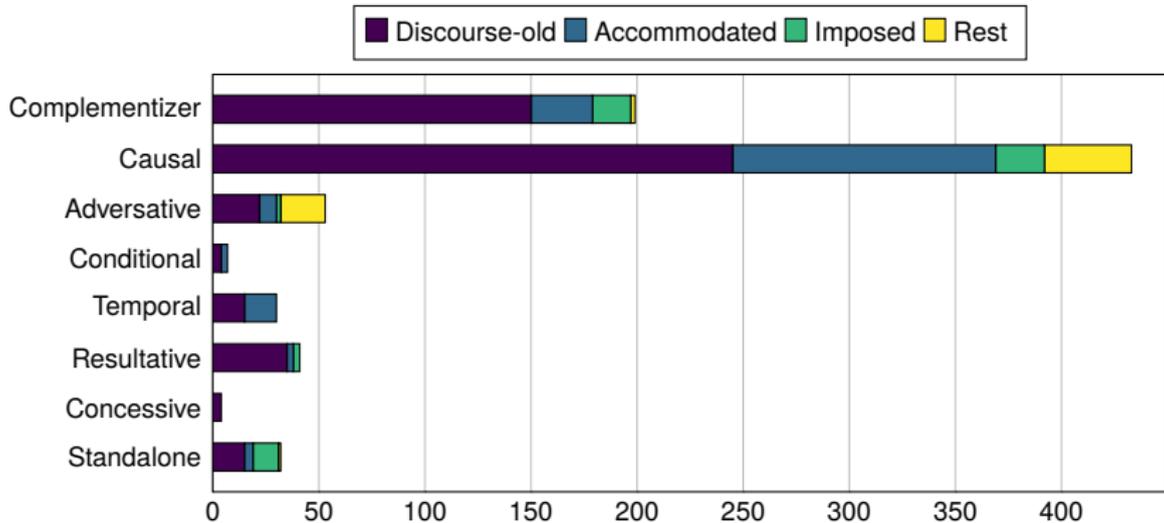

- (22) life.of Yahweh *kī* son.of death the=man the=do\PTCP-M.SG this
 'By the life of Yahweh, (*that*) the man who does this is a dead man!' (2 Sam. 12:5)

Standalone *kī*, type 3: conducive/rhetorical questions

These speech acts also carry an implicit assertion, which may be accommodated or imposed:

- (23) Q=*kī* call\PFV-3M.SG name(M)-his Jacob and.PRET-3M-deceive-SG-me this time-DU
'Isn't his name Jacob? He has deceived me these two times!' (Gen. 27:36)

Biblical Hebrew *kī*: summary & conclusions

Biblical Hebrew *kī*: summary & conclusions

The function of *kī* can be described as:

1. Referring to **Common Ground**
 - a) As a **complementizer** introducing subject and object clauses
 - b) When **connecting two clauses**: introducing adverbials (causal, adversative, conditional, temporal, resultative, concessive)
 - c) When **standalone**: marking exclamatives, oaths, and conducive/rhetorical questions
2. Lexicalized **causal** meaning (generalization of causal function referring to CG)
3. Lexicalized **adversative** meaning (developed from causal function)

Biblical Hebrew *kī*: summary & conclusions

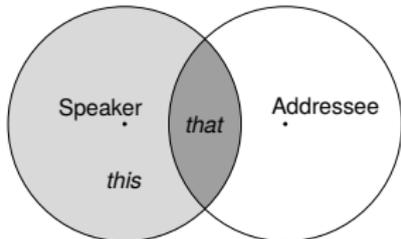

The function of *kī* can be described as:

1. Referring to **Common Ground**
 - a) As a **complementizer** introducing subject and object clauses
 - b) When **connecting two clauses**: introducing adverbials (causal, adversative, conditional, temporal, resultative, concessive)
 - c) When **standalone**: marking exclamatives, oaths, and conducive/rhetorical questions
2. Lexicalized **causal** meaning (generalization of causal function referring to CG)
3. Lexicalized **adversative** meaning (developed from causal function)

The function in context can easily be deduced based on syntactic and pragmatic clues

Discussion

- ▶ Apparent high degree of polysemy can be reduced to **Common Ground** (incl. accommodation and imposition)
- ▶ These are general notions that can also be used to describe Germanic and Romance complementizers (Staps & Rooryck 2023), but here we extended them to **adverbial functions**
- ▶ Common Ground can be linked to a **[+distal]** feature because the Addressee is “far” from the Speaker

Camil Staps & Johan Rooryck. 2023. The interpretation of [+distal] in demonstratives and complementizers. *Linguistics* 61. 1195–1231. <https://doi.org/10.1515/ling-2022-0178>
